### **Factory Settings without installation disc** *Acer Factory Default Backup*

using the Acer Care Center I created a "Factory Default Backup" on a USB key. Your user guide suggested a 16GB USB key (32gb Recommended), 32GB I used. When the process was finished I checked the USB key to see that only 9GB was used. Is there a reason for 32GB, if ever needed in the future is the remaining odd 21GB used during install (possibly unpacking files) I ask because I have a 16GB key that I don't use.
