The brothers of the abbey of St Martin's-in-the-Marsh pay little heed to the tales of robber baron Sir Geoffrey Mandeville's ghost galloping through the Lincolnshire fens with a retinue of ghastly horseman. They may hear the shrill blast of a hunting horn, or see the corpse candles glowing in the dark, but their comfortable life is protected by a high

wall and their powerful abbot. Until Abbot Stephen, a friend of the King, is found dead and Sir Hugh Corbett, Keeper of the King's Seal, arrives to investigate.

More is going on than meets the eye in the Port Royal Exotic Animal Hospital, a state-of-the-art facility in a wealthy community in southwest Florida. Dr. Carston Spencer and his wife Madison, who own the hospital, are prominent residents in Port Royal, but few know the skeletons in their closets. Carston kicked a drug addiction that cost his former wife and children, although he's stayed sober for 14 years, and Madison is considering an affair with a hot young cowboy who works at the hospital, although she'd prefer to wait until her divorce is final. A trial over who killed a staff member's father may put even more pressure on those at the hospital as rumors of an incestuous affair involving two sisters and their father lie at the heart of their self-defense claim. Friendships and deals between prominent doctors, a high-powered real estate agency, state's attorney, sheriff's deputy, businessmen, ranch hands, and an exotic bird breeder mean anything can happen. The PREAH Secrets, inspired by real events, takes readers on a wild ride of secrets, sex, murder and deceit, with one twist after another until the dramatic conclusion.

Spectroscopy enables the precise study of astronomical objects and phenomena. Bridging the gap between physics and astronomy, this is the first integrated graduate-level textbook on atomic astrophysics. It covers the basics of atomic physics and astrophysics, including state-of-the-art research applications, methods and tools. The content is evenly balanced between the physical foundations of spectroscopy and their applications to astronomical objects and cosmology. An undergraduate knowledge of physics is assumed, and relevant basic material is summarized at the beginning of each chapter. The material is completely self-contained and features sufficient background information for self-study. Advanced users will find it handy for spectroscopic studies. A website hosted by the authors contains updates, corrections, exercises and solutions, as well as news items from physics and astronomy related to spectroscopy. murdered. It's been more than forty years since that August night, but Julie's memories of her sister's death still shape her world. Now someone from her past is raising questions about what really happened that night. About Julie's own complicity. About a devastating secret her mother kept from them all. About the person who went to prison for Izzy's murder—and the person who didn't. Faced with questions and armed with few answers, Julie must gather the courage to revisit her past and untangle the complex emotions that led to one unspeakable act of violence on the bay at midnight. Beth and Darren are two researchers who are sent to determine the possible value in deserted mines. They have done this a hundred times before, and know they will do it a hundred times again. Or will they? Their innocent trespass into Site 184 is the catalyst to a series of events that is both unexplainable and fascinating. It marks the fierce struggle against time, space and life.

"Pardon my French, but you are one darn major American writer!"—Richard Bach The twelve literary, suspense tales and dark vignettes collected in Sandcastle and Other Stories are nothing short of an adventure through a roiling sea of emotion. You'll listen as an old man twisted by fate and a lost love shares his life's journey . .

. marvel at a young girl playing on the ocean shore as she becomes entangled in nets of a mercurial god . . . witness a divorced man become mired in troubles after he's coerced into taking a singles cruise . . . follow a Hollywood actor in a television drama who's always typecast as the bad boy . . . struggle along with a child kept awake by night terrors, and, most shockingly, observe a woman who hides her secretive personality from everyone on the beach one sunny day. The genuine voices of the characters, mixed with a clear-eyed tonal directness, make this a series with mesmerizing psychological interaction. Sandcastle and Other Stories spans a broad depth of human understanding and builds a bridge between the deepest chasms of human frailty, and, by the last tale, the highest portal of redemption. Read and stand witness to unspeakable hate sitting with cozy wile, right beside unconditional love—a provocative and compelling mirror on the human condition. "Bog has a keen eye for what makes people tick, especially when their clockwork is decidedly rusty and the urges it drives are less than ideal. These stories take a microscopic view at the ordinary that, in turn, molds it into something uncanny. The underlying darkness takes different forms with each one, but never is it absent, and never does it feel anything less than utterly natural."—Josh Black, horror novel reviews
