Kirkpatrick, Lee A ...

The Evolutionary Theory of Attachment – John Bowlby, 1969 (Description, AO1): Bowlby ' s theory (1969) is an evolutionary theory. He proposed infants form an attachment to a caregiver because attachment is adaptive (aids survival). Attachment is seen as a biological process because he argues infants are born with an ' attachment gene ' that programmes them to exhibit innate behaviours called ' social releasers ' which increase their chances of receiving care such as clinging, crying

Psychology of Religion by ...

Attachment theory is one of the most enduring theoretical frameworks in psychology, spanning the areas of developmental psychology, social/personality psychology, and evolutionary psychology. Broadly, classical attachment theory, originally developed by John Bowlby, focuses on the development of attachment bonds between parents and infants, and how those early attachments influence social development throughout childhood and into adolescence, coalescing in adult romantic attachments.

(PDF) Attachment, Evolution, and the Psychology of Religion

Bowlby (1958) proposed that attachment can be understood within an evolutionary context in that the caregiver provides safety and security for the infant. Attachment is adaptive as it enhances the infant 's chance of survival. This is illustrated in the work of Lorenz (1935) and Harlow (1958) .

Acces PDF Attachment Evolution And The Psychology Of Religion ...

The incorporation of evolutionary theory into psychology has waxed and waned in the 150 years since Darwin (1859) predicted that the field would be based on a new foundation. There are many notable examples of psychological theories with evolutionary bases, such as Bowlby ' s (1969) model of attachment, yet these are often isolated examples.

Evolutionary Theory and Psychology
The field of evolutionary psychology looks at how evolutionary pressures led to particular adaptations such as these. Evolutionary psychology is related to both macroevolution in the sense that it looks at how the human species (especially the brain) has changed over time, and it is also rooted in the ideas attributed to
