Chaetoceros is
probably the
largest genus of
marine

File Type PDF

Chaetoceros

planktonic

diatoms with
approximately
400 species

described,

although a large
number of these
descriptions are
no longer valid.

It is often very
difficult to
distinguish
between
different

File Type PDF

Chaetoceros

Chaetoceros

species. Several attempts have been made to

restructure this large genus into subgenera and this work is still in progress.

However, most of the effort to describe species has been focused

File Type PDF

Chaetoceros

in boreal areas,
and the genus is
cosmopolitan, so
there are
