In 1963, Jane Roberts met a spiritual entity named Seth. He spoke through her and the lessons he taught proved timeless and crucial. From 1968 to 1975, Roberts held an ESP class, during which she channeled Seth. Susan Watkins was a member of that class. The knowledge gained from Seth helped Watkins and her classmates face serious illness, painful relationships, financial hardship, and natural catastrophe. It also changed their lives. In addition to being a well-written, highly entertaining historical account of the late Jane Roberts and her class, Conversations with Seth reveals the profound insights discovered by class members--insights into the origin of both the troubling and triumphant events in our lives and into the vast nature of human consciousness. Roberts' Seth material is consistently one of the top two most visited collections at the Yale University Archives. The story that launched the New Age movement.

Poet, novelist, author of the Seth Material, Jane Roberts's books have sold over 7.5 million copies. She was one of the most important psychics of the twentieth century. Now, Speaking of Jane Roberts reveals a woman as fascinating as the material she produced. Susan Watkins and Jane Roberts were friends for sixteen years. Early on, Seth, the entity who spoke through Roberts, told the two women that they were counterparts, connected in this particular lifetime to work out some shared personal issues. In addition to being a compassionate and sometimes painfully honest look at Roberts's life--her difficult childhood, her constant questioning of psychic abilities and sources of creativity, her resistance to Seth's advice, her dramatic struggles with her health. Speaking of Jane Roberts is also a beautiful and applicable illustration of the counterpart relationship. The connection that Watkins and Roberts shared reveals something important about the power and mystery of the connections we all share with the people closest to us. * Watkins also offers original insights into the phenomenon of channeling.

In 1963, Jane Roberts met a spiritual entity named Seth. He spoke through her and the lessons he taught proved timeless and crucial. Roberts went on to write much about her channeling experiences with Seth and her books have sold 2.5 million copies. Her Seth material is consistently one of the top two most visited collections at the Yale University Archives. From 1968 to 1975 Roberts held an ESP class in her home, during which she channeled Seth. Sue Watkins was a member of that class. The knowledge she gained from the Seth sessions changed Watkins's life. In fact, it changed the lives of all the class participants. In Volume II of the Seth series, Watkins shares the insights she discovered while participating in Roberts's groundbreaking classes. The personal, social, and political issues addressed in Conversations with Seth are as relevant today as ever and include health, sexual identity, wealth and poverty, the military draft, relationships, dreams, ESP, reincarnation and more. Seth expands on many of the topics raised in book 1 and also explores provocative new material: the correlation between our beliefs, dreams, and daily experience; the concept of probabilities, counterparts, and individual identity; the very real difficulties of applying the "you create your own reality" concept to daily life. Also included is a fascinating discussion of Christ. And, as in the first book, Seth addresses the personal, ongoing issues that class members experienced over the years--troubled marriages, illness, financial hardships, and more.

Seth is the acclaimed non-physical teacher whose collected works are the most dynamic, brilliant and undistorted map of inner reality and human potential available today. His articulation of the furthest reaches of human potential, the eternal validity of the soul, and the concept that we create our own reality according to our beliefs, has been presented in books that have sold over 8 million copies and been translated into over a dozen languages. Seth's empowering voice clearly stands out as one of the major forces which led to the current New Age philosophical movement. This book chronicles Seth's first contact with author and medium Jane Roberts. It is a mixture of great Seth excerpts, selected by topic, and further explained by Jane. Topics covered include: afterdeath & between lives, how to get rid of illness, reincarnation, why people are born into different circumstances, God, All That Is, Dreams, exercises to develop the inner senses, and much more.

What if all those seemingly insignificant little what a coincidence! moments you've experienced were actually hinting at something very personal and important about yourself, and about the workings of human consciousness as a whole? Would you listen? Sue Watkins does. For more than thirty-five years, Susan M. Watkins, a former small-town newspaper reporter and the author of five books, has logged coincidences as they've occurred in her life. What she's discovered is that single, seemingly inconsequential coincidences--an old friend calling at the exact moment she pops into your head, for example--are often pieces of larger, more complex and meaningful coincidence clusters that together create rich and revealing stories. In What a Coincidence! Watkins presents coincidence clusters that are truly astounding and, along the way, explores those two important questions: What do our personal coincidence clusters reveal to us about ourselves and our lives? And what do they reveal about human consciousness at large? The conclusions she draws are utterly life altering. You will never brush off those what a coincidence! moments again.

A child is educated into the "Parade of Life" and in turn teaches his people to work cooperatively with nature and all its aspects of life and death.

Susan M. Watkin's new revision of Clothing: The Portable Environment, enlivened by 385 illustrations, updates and enlarges her previous study. Watkins writes for the student and teacher of clothing design, the design professional, and the interested layperson. Her text presents the basic processes, theories, and ingredients of clothing creation. The problem-oriented practicing designer and student are offered guidance in database use and selected keywords for each subject - keys to electronic information sources. The author examines functional clothing design for athletes, astronauts, soldier, and others. She also considers garments used by those with special needs - the asbestos worker, the elderly, the person with disabilities - and offers tests for assessment of mobility, sizing, and fit. Other chapters cover materials, designs, and systems for thermal protection: impact theory and protection; clothing for hazardous environments; mobility in clothing; fastening systems, including heat sealing; special needs clothing; and the process of design. Lists of references and a bibliography for further reading are included.
