I've had the Hitachi 42HDS52 for nearly three weeks (I
happened to be on the phone with Hitachi today and I
was told, that I was probably one of the very first in
the U.S. to own one of the new S52's). If anyone was
in CC trying to compare the Panny, chances are they
were looking at the lower-end Hitachi (42HDF52), in
which case the Panny would most certainly have won.
But if anyone thinks the ...

Alice must choose between Patrick and Sam in this beloved series. How can someone be in love with two people at the same time? It doesn't make sense to Alice—until Sam, her friend from Camera Club, starts to pay attention to her. Sam is quiet, gentle, and a terrific dancer, and Alice likes being with him. But Alice has been Patrick's girlfriend for almost two years—so why is she interested in another guy? As Alice stumbles her way through the minefield of early adolescence, there are plenty of bumps, giggles, and surprises along the way. Every girl should grow up with Alice, and with this irresistible new look, a whole new generation will want to.

This book offers students and practitioners alike an integrated approach to strategic planning for companies. Marcos Fava Neves presents a new and unique perspective on this critical topic based on three main points: strongly demand-driven decisions that bridge the gap between long- and short-term strategy; a vision of a company as an integrated network, full of relationships that deserve consideration during the planning process; and the introduction of 'collective-action' thinking, which raises the prospect for cooperation between competitors. With this clear, comprehensive framework for strategic planning, companies can be sure to navigate today's complex environment and enhance their prospects of success.

Many people will remember that Rachel Carson predicted a silent spring, but she also warned of a fruitless fall, a time with no pollination and no fruit. The fruitless fall nearly became a reality when, in 2007, beekeepers watched thirty billion bees mysteriously die. And they continue to disappear. The remaining pollinators, essential to the cultivation of a third of American crops, are now trucked across the country and flown around the world, pushing them ever closer to collapse. Fruitless Fall does more than just highlight this growing agricultural catastrophe. It emphasizes the miracle of flowering plants and their pollination partners, and urges readers not to take the abundance of our Earth for granted. A new afterword by the author tracks the most recent developments in this ongoing crisis.
