A Reactive Training Manual Overview / Elite FTS

The crux of RTS is autoregulation of training load based on RPE (how hard does the set feel, or proximity of failure) and fatigue percents (the way to regulate training stress).

Analysis of Reactive Training Systems - Complementary Training

Intensities for the contest lifts were kept fairly high. In the beginning of a training cycle, they would start about 80% and then gradually increase in waves up to 92-95%. The overall pattern of intensity was linear, but it came and went in waves. All of Laddie's training was done using an RPE system to auto-regulate the weight on the bar.
