Late modernity brings us other problems, however, and Bauman draws on alternative psychological theories which suggest that contemporary men and women are not tormented by the pressure of ideals they cannot live up to, but by the absence of any such ideals, the dearth of recipes for a decent life and the lack of a predictable destination for our life itinerary. The result, for individuals, is mental depression, by which Bauman means feelings of impotence, of inadequacy to the tasks of life.

In this major theoretical statement, the author offers a new and provocative interpretation of the institutional transformations associated with modernity. We do not as yet, he argues, live in a post-modern world. Rather the distinctive characteristics of our major social institutions in the closing period of the twentieth century express the emergence of a period of 'high modernity,' in which prior trends are radicalised rather than undermined. universe may eventually come into being, but this as yet lies 'on the other side' of the forms of social and cultural organization which currently dominate world history. In developing an account of the nature of modernity, Giddens concentrates upon analyzing the intersections between trust and risk, and security and danger, in the modern world. Both the trust mechanisms associated with modernity and the distinctive 'risk profile' it produces, he argues, are distinctively different from those characteristic of pre-modern social orders. This book build upon the author's previous theoretical writings, and will be of fundamental interest to anyone concerned with Giddens's overall project. However, the work covers issues which the author has not previously analyzed and extends the scope of his work into areas of pressing practical concern. This book will be essential reading for second year undergraduates and above in sociology, politics, philosophy, and cultural studies.

The distinctive characteristics of our major social institutions in the closing years of the twentieth century suggest that, rather than entering into a period of post-modernity, we are moving into a period of “high modernity” in which the consequences of modernity are becoming more radicalized and universalized than before. A post-modern social universe may eventually come into being, but this as yet lies on the other side of the forms of social and cultural organization that currently dominate world history. In developing a fresh characterization of the nature of modernity, the author concentrates on the themes of security versus danger and o trust versus risk . Modernity is a double-edged phenomenon. The development of modern social institutions has created vastly greater opportunities for human beings to enjoy a secure and rewarding existencethan in any type of pre-modern system. But modernity also has a somber side that has become very important in the present century, such as the frequently degrading nature of modern industrial work, the growth of totalitarianism, the threat of environmentsal destruction, and the alrming development of military power and weaponry. This major study develops a new account of modernity and its relation to the self. Building upon the ideas set out in *The Consequences of Modernity*, Giddens argues that 'high' or 'late' modernity is a post traditional order characterised by a developed institutional reflexivity. In the current period, the globalising tendencies of modern institutions are accompanied by a transformation of day-to-day social life having profound implications for personal activities. The self becomes a 'reflexive project', sustained through a revisable narrative of self identity. The reflexive project of the self, the author seeks to show, is a form of control or mastery which parallels the overall orientation of modern institutions towards 'colonising the future'. Yet it also helps promote tendencies which place that orientation radically in question - and which provide the substance of a new political agenda for late modernity. In this book Giddens concerns himself with themes he has often been accused of unduly neglecting, including especially the psychology of self and self-identity. The volumes are a decisive step in the development of his thinking, and will be essential reading for students and professionals

Once lauded as the wave of the African future, Zambia's economic boom in the 1960s and early 1970s was fueled by the export of copper and other primary materials. Since the mid-1970s, however, the urban economy has rapidly deteriorated, leaving workers scrambling to get by. *Expectations of Modernity* explores the social and cultural responses to this prolonged period of sharp economic decline. Focusing on the experiences of mineworkers in the Copperbelt region, James Ferguson traces the failure of standard narratives of urbanization and social change to make sense of the Copperbelt's recent history. He instead develops alternative analytic tools appropriate for an "ethnography of decline." Ferguson shows how the Zambian copper workers understand their own experience of social, cultural, and economic "advance" and "decline." Ferguson's ethnographic study transports us into their lives—the dynamics of their relations with family and friends, as well as copper companies and government agencies. Theoretically sophisticated and vividly written, *Expectations of Modernity* will appeal not only to those interested in

Africa today, but to anyone contemplating the illusory successes of today's globalizing economy.

The production of 'human waste' - or more precisely, wasted lives, the 'superfluous' populations of migrants, refugees and other outcasts - is an inevitable outcome of modernization. It is an unavoidable side-effect of economic progress and the quest for order which is characteristic of modernity. As long as large parts of the world remained wholly or partly unaffected by modernization, they were treated by modernizing societies as lands that were able to absorb the excess of population in the 'developed countries'. Global solutions were sought, and temporarily found, to locally produced overpopulation problems. But as modernization has reached the furthest lands of the planet, 'redundant population' is produced everywhere and all localities have to bear the consequences of modernity's global triumph. They are now confronted with the need to seek - in vain, it seems - local solutions to globally produced problems. The global spread of the modernity has given rise to growing quantities of human beings who are deprived of adequate means of survival, but the planet is fast running out of places to put them. Hence the new anxieties about 'immigrants' and 'asylum seekers' and the growing role played by diffuse 'security fears' on the contemporary political agenda. With

characteristic brilliance, this new book by Zygmunt Bauman unravels the impact of this transformation on our contemporary culture and politics and shows that the problem of coping with 'human waste' provides a key for understanding some otherwise baffling features of our shared life, from the strategies of global domination to the most intimate aspects of human relationships.

In this new book, Bauman examines how we have moved away from a 'heavy' and 'solid', hardware-focused modernity to a 'light' and 'liquid', software-based modernity. This passage, he argues, has brought profound change to all aspects of the human condition. The new remoteness and un-reachability of global systemic structure coupled with the unstructured and under-defined, fluid state of the immediate setting of life-politics and human togetherness, call for the rethinking of the concepts and cognitive frames used to narrate human individual experience and their joint history. This book is dedicated to this task. Bauman selects five of the basic concepts which have served to make sense of shared human life - emancipation, individuality, time/space, work and community - and traces their successive incarnations and changes of meaning. Liquid Modernity concludes the analysis undertaken in Bauman's two previous books Globalization: The Human Consequences and In Search of Politics.

Together these volumes form a brilliant analysis of the changing conditions of social and political life by one of the most original thinkers writing today.

This panoramic analysis of the condition of Western societies has been hailed as a classic. This first English edition has taken its place as a core text of contemporary sociology alongside earlier typifications of society as postindustrial and current debates about the social dimensions of the postmodern. Underpinning the analysis is the notion of the 'risk society'. The changing nature of society's relation to production and distribution is related to the environmental impact as a totalizing, globalizing economy based on scientific and technical knowledge becomes more central to social organization and social conflict.

"Can Modernity Survive? is bound to become the centre and the starting point of all future discourse on modernity."--Zygmunt Bauman

In his native Italy Augusto Del Noce is regarded as one of the preeminent political thinkers and philosophers of the period after the Second World War. The Crisis of Modernity makes available for the first time in English a selection of Del Noce's essays and lectures on

the cultural history of the twentieth century. Del Noce maintained that twentieth-century history must be understood specifically as a philosophical history, because Western culture was profoundly affected by the major philosophies of the previous century such as idealism, Marxism, and positivism. Such philosophies became the secular, neo-gnostic surrogate of Christianity for the European educated classes after the French Revolution, and the next century put them to the practical test, bringing to light their ultimate and necessary consequences. One of the first thinkers to recognize the failure of Marxism, Del Noce posited that this failure set the stage for a new secular, technocratic society that had taken up Marx's historical materialism and atheism while rejecting his revolutionary doctrine. Displaying Del Noce's rare ability to reconstruct intellectual genealogies and to expose the deep metaphysical premises of social and political movements, *The Crisis of Modernity* presents an original reading of secularization, scientism, the sexual revolution, and the history of modern Western culture.
