Mary Morgan in her The World in the Model provides an anthropological account of economists as model-makers and model-users – a mixture of their stories, their practices, and their languages. In Morgan's case studies, history provides an insightful window on methodology and philosophy, which, in turn, enlightens and enlivens a complex and previously untold history. '

~~The World in the Model by Mary S. Morgan~~

During the last two centuries, the way economic science is done has changed radically: it has become a social science based on mathematical models in place of words. This book describes and analyses that change - both historically and philosophically - using a series of case studies to illuminate the nature and the implications of these changes.

~~(PDF) The world in the model: How economists work and think~~

Nowadays, economists describe the world in pieces of mathematics and explain the phenomena of the real-world economy by reasoning with those little models. The World in the Model tells the story of this major cognitive shift in the way economic science is done, a shift involving imaginative and creative resources as well as a new mode of reasoning.

The World3 model is a system dynamics model for computer simulation of interactions between population, industrial growth, food production and limits in the ecosystems of the earth. It was originally produced and used by a Club of Rome study that produced the model and the book The Limits to Growth (1972).

~~World3 - Wikipedia~~

The SEIR model is fit to the output of the death model by using an estimated IFR to back-calculate the true number of infections. The model uses several other types of data to simulate transmission and disease progression: mobility, social distancing policies, population density, pneumonia seasonality and death rate, air pollution, altitude, smoking rates, and self-reported contacts and mask use.
