room if one is available). If you've never been in the venue, try getting there early and walk the room. Make sure you have water available. 2.

How to give a dynamic scientific presentation

NOTE: AVOID writing whole sentences which simply say what test you used to analyze a result followed by another giving the result. This wastes precious words (economy!!) and unnecessarily increases your paper's length. Summarizing Statistical Test Outcomes in Figures

How to Write Guide: Reporting Statistics in Your Paper

The key to an effective conference presentation lies in being well-prepared. Here are a few tips that will make the process smoother for you: 1. Write your paper with the audience in mind: A conference paper should be different from a journal article. Remember that your paper is meant to be heard, not read. Audiences typically have lower attention spans than readers; therefore, keep the content simple and straightforward.

8 Tips for presenting a paper at an academic conference ...

Writing a "good" results section. This is the core of the paper. Don't start the results sections with methods you left out of the Materials and Methods section. You need to give an overall description of the experiments and present the data you found. • Factual statements supported by evidence.
